

We are Sheeran Class and we are working within **Pathway One**.

Communication

We are at the early stages of communication which means we communicate in lots of ways, including signing, visuals, gestures and facial expressions as well as some words. Our adults support us with this by using our preferred communication methods.

Learning Styles

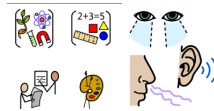

We are learning to communicate and share our attention with others using Intensive Interaction. We enjoy multisensory and play-based approaches to learning.

Emotional and Sensory Regulation

We are starting to recognise we have different feelings. We need our adults to support us to find the best way to manage these feelings. Our adults support us to meet our sensory needs.

Curriculum

Most of our learning is focused around our personal outcomes for communication etc. We do not follow the National Curriculum. Our adults support us to learn about the wider world and prepare us for the future.

Assessment

The majority of our learning will be evidenced collected in videos and photos.

What you need to know about our class

We are starting to communicate using a range of vocalisations. We need short, clear instructions and concrete objects to help us learn. We explore learning individually. We are focusing on learning to self-regulate and can be very sensitive to our clothing.
